If known at this time, please provide a three-sentence description of the proposal that addresses what is being proposed, who and or what in the health system would be affected, and what the basic approach to reform would be.

Many health care reform proposals assume that improving health care requires more legislation dictating how patients, doctors and insurance companies may or may not cooperate. Since government is already heavily involved in health care, this proposal does the opposite. It will identify, and recommend changes to, existing state-level legislation that inhibits medical practitioners, insurance companies, and charitable organizations from providing quality low-cost health care to all Coloradians in a dynamic, fair, and competitive marketplace.
